

## AI Tracking Module II Update Log

|                                      |            |
|--------------------------------------|------------|
| Date:                                | 2025-06-07 |
| AI Tracking Module Firmware Version: | V1.0.1     |
| SIYI UniGCS (Android):               | V1.1.11    |
| SIYI UniGCS (Windows):               | V1.1.3     |

---

### Update content:

#### New Features:

1. Custom AI model import.
2. AI model of optical camera: Removed “insulators” model from AI model, added recognition of Planes, Ships, Fire, Smoke and Insulators to “Normal” model.

#### Performance Improvement:

1. AI tracking module II optimizes H265 output encoding parameters for smoother and clearer use in products such as UniRC 7/7PRO.
2. Canceled fixed 720P video stream output and optimized the output bitrate.

#### Bug Fixed:

1. Abnormal RTSP video stream receiving via SIYI SDK protocol, added RTSP stream output control protocol.
