

## UniRC 10 Pro UPDATE RECORD

Date:	Feb.04, 2026
Ground Unit Firmware Version:	1.1.0
Air Unit Firmware Version:	1.1.0
Video Transmission Firmware Version:	1.0.8
Power Module Firmware Version:	1.0.2
UniGCS APP Version:	3.0.2

---

### Update Content:

#### Added New Functions:

1. Added dual-control function.
2. Upgrade the UniRC 10 Pro firmware upgrade function (Requires boot version 0.2.3 or above).
3. Support for configuring and modifying the image transmission encryption algorithm.
4. Added power level detection upon startup; if the power is below 0%, startup is restricted, and the power indicator light flashes four times as a reminder.

#### Performance Optimization:

1. Optimized the firmware upgrade method for the image transmission system to increase the upgrade speed.
2. Optimized the display logic of the charging status indicator light.
